SUMMARY

Highly motivated and detail-oriented Front-End Developer passionate about creating responsive, user-friendly, and efficient web applications. Proficient in modern web technologies including HTML5, CSS3, JavaScript, React.js, and Next.js. Experienced in state management with Redux and skilled in crafting scalable and maintainable styles using Tailwind CSS, Bootstrap, and Sass.

Adept at version control with Git and GitHub, ensuring seamless collaboration in team environments.

Committed to continuous learning and eager to contribute to innovative projects, excited to bring creative solutions and deliver high-quality web experiences as part of a dynamic development team.

EXPERIENCE

Front-End Developer - Gi Properties - Dubai

OCT 2025 - PRESENT

- Led the front-end migration from a legacy EJS-based architecture to a modern Next.js + TypeScript stack, improving Core Web Vitals (LCP/FID) by 40% and enhancing scalability and maintainability.
- Optimized the legacy EJS setup by implementing structured package management and introducing Webpack bundling, reducing asset size and improving load performance.
- Implemented caching strategies using Service Workers, decreasing repeat load times and improving overall user experience.
- Collaborated closely with the backend team to refine API contracts, reduce redundant client-server requests, and enhance SEO performance.
- Designed and structured a scalable front-end architecture leveraging SSR and SSG in Next.js to improve indexing, performance, and user engagement.
- Introduced reusable component architecture and applied design system principles to ensure UI consistency and faster feature delivery.
- Built a custom internal CMS dashboard enabling SEO and content teams to manage dynamic assets independently, reducing engineering workload.
- Established performance monitoring workflows using Lighthouse audits and real user metrics to continuously measure and improve web performance.
- Implemented environment-based build optimization strategies for staging and production environments to enhance deployment efficiency.
- Improved developer experience by enforcing TypeScript strict mode, ESLint standards, and clean code practices across the project.
- Integrated Google Analytics and Google Tag Manager to track user behavior and conversion metrics for data-driven decisions.
- Applied technical SEO strategies including semantic HTML restructuring and structured data (schema markup).
- Developed responsive, high-fidelity UI components using modern HTML5, CSS3, and TypeScript to ensure seamless cross-platform experiences.

Front-End Developer - Didi Global - China

May 2025 - Sep 2025

- Developed responsive user interfaces using modern framework Next.js and TypeScript, ensuring seamless experiences across devices while aligning with evolving global mobility requirements.
- Integrated localization modules using React Intl and i18next, delivering multi-language support for 13 countries and reducing deployment errors.
- Assessed TailwindCSS V4 integration within application codebase by reviewing components and layouts, applying fixes to ensure alignment with updated framework conventions.
- Configured and managed website tracking by implementing triggers and tags with Google Tag Manager (GTM), enhancing analytics integrations for web applications.

Web Developer - OVZA LTD - UK

Sep 2024 - Feb 2025

- Implemented and maintained front-end solutions that enhanced user experience while ensuring cross-browser compatibility and mobile responsiveness.
- Optimized website performance through code refinement, image optimization, and implementation of best practices.
- Integrated APIs and third-party services to enhance website functionality and user engagement.

- Conducted thorough testing and debugging to ensure optimal site performance across different devices and browsers.
- Implemented SEO best practices in website architecture and markup.
- Maintained website security through regular updates and implementation of security protocols.
- Utilized version control systems (Git) for efficient code management and collaboration.
- Analyzed and debugged issues in web applications by conducting thorough code reviews and testing, ensuring 30% reduction in error rates over a 6-month period using advanced debugging tools.

CERTIFICATIONS

Programming with JavaScript - Meta

2024

- Developed proficiency in core JavaScript concepts and modern ES6+ features Created interactive web applications using JavaScript frameworks
- Implemented asynchronous programming and DOM manipulation

Increase SEO Traffic - Coursera

2024

- An online non-credit project authorized by Coursera Project Network and offered through Coursera.
- Helped me to understand how the Search engine is working behind the scenes.
- Taught how to increase the seo and got to learn about sitemaps.

COURSES

HTML & CSS - Mahara-tech

2024

- Built responsive websites using semantic HTML5 and modern CSS3 Implemented flexbox and grid systems for advanced layouts Applied mobile-first.
- Design principles and media queries.

Database Fundamentals - Mahara-tech

2024

- Mastered SQL database design and normalization principles Implemented database queries and relationships Experience with database management systems and optimization techniques.

EDUCATION

Front-end and Cross-platform Mobile Development - ITI Information technology institute

April 2024 - Oct 2024

Bachelor Degree in Business - Ain Shams University - Egypt

Sep 2018 - May 2022

SKILLS

- **Frameworks:** Next.js, React.js, Angular 18, EJS.
- **Languages:** TypeScript, JavaScript (ES6+), Dart, HTML5.
- **State Management:** Redux, Redux Toolkit, Zustand.
- **Styling & UI:** Tailwind CSS, Sass, Bootstrap, RadixUI, Chakra UI, Framer Motion.
- **Tools & Analytics:** Git, GitHub, Google Tag Manager (GTM), Google Analytics, Firebase.
- **Testing:** Cypress.
